Paint a Rainbow and Join the Trail!

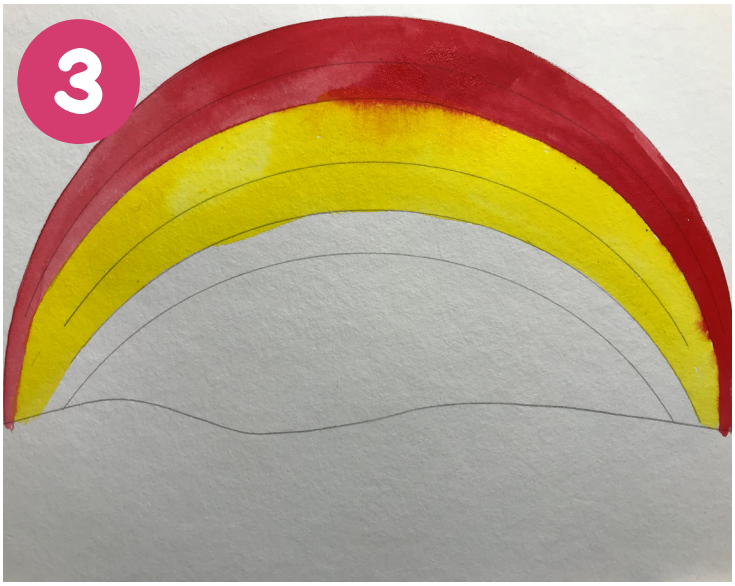

Step-by-step Guide

First of all you need to draw the arc of the rainbow. Get a good sized plate and draw round to make the top of the rainbow. Then move the plate down a fraction and draw another arc. Do this until you have six lines.

Colour the first two top gaps between the lines with red. If using paint, let it dry before continuing.

Then colour the third and fourth gaps in yellow before colouring over the second red line to make orange. If using paint keep cleaning your brush to keep the colour clean.

Now colour the last space at the bottom with blue. Then colour over the yellow space above it to make green.

You have a beautiful rainbow which you could display in the wind to cheer people up and give them hope. Lots of people are doing this..look out for them during your daily exercise if you're able to get out.

If you like you could add a black silhouette underneath. I added a family walking together under my rainbow. What could you add under yours? Hope you've had fun. Don't forget to stick it on your window for others to enjoy. Remember to let us know how you get on and send us photos of your cards, we'd love to see them!
